Summary

I build products that move money and people.

Currently at EY, building transparency and innovation in Global Mobility space. I build products that sit at the intersection of Global Mobility, Compliance, and Automation. My experience spans end-to-end immigration and tax workflows, and I'm now focused on bringing AI-driven decisioning and workflow orchestration into these domains.

Always open to conversations about product strategy, delivery and unlocking value through AI. Let's connect → swami.anand24@gmail.com

Experience

EY

Assistant Director - Product

August 2023 - Present (2 years 9 months)

India

:

Led end-to-end development of new mobility and compliance products, from concept to launch, including traveler management, document intelligence, and policy automation.

Drove cross-functional execution across engineering, design, and data science to build scalable platform capabilities and an API ecosystem powering partner integrations.

Built workflow intelligence and automated decision engines used by enterprise administrators across 120+ countries.

Introduced an internal GenAI product delivery framework adopted by product teams to accelerate roadmap execution.

Partnered with senior leadership to secure product sponsorship, influence investments, and align the platform vision across business units.

Deloitte

7 years 1 month

Senior Product Manager

June 2019 - May 2023 (4 years)

Bangalore

– :

Owned payment platform capabilities including gateway APIs, webhooks, cross-border flows, multi-currency processing, and risk-based authentication. Shipped features that improved resilience, reduced operational overhead, and supported rapid scale across partner ecosystems.

–

Built a high-performance mobile app for elite athletes, replacing manual processes with unified training, wellness, and communication workflows. Led experiments and iterative improvements on engagement surfaces to deepen user interaction and feature adoption.

Product Manager

May 2016 - May 2019 (3 years 1 month)

Bengaluru

– ():

Enhanced onboarding workflows for restaurants and partner merchants, improving activation experience through self-service tools and streamlined funnel design.

Built systems for menu digitization, bulk onboarding, and multi-location setup to support large enterprise partners.

Delivered platform improvements that reduced operational touchpoints and enabled faster merchant go-live.

:

Conducted 3 workshops for 50+ participants guiding them through the journey of agile transformation

Coached teams on Agile concepts including Story Mapping, User Stories, Release Planning, Scrum Framework, Story Points Estimation, and Agile Metrics (Burn-down charts, and Cumulative Flow Diagrams)

Tata Consultancy Services

Business Intelligence Analyst

November 2010 - May 2014 (3 years 7 months)

Greater Chennai Area

Designed and maintained data pipelines supporting insights for transactions, fraud monitoring, card usage, and settlements.

Automated validation and reporting workflows to improve accuracy and reduce manual effort for operations teams.

Collaborated with business stakeholders to translate banking requirements into scalable ETL and dashboarding solutions.
